

Global Protocol for Community-Scale Greenhouse Gas Emission Inventories (GPC)

GPC, the world's most widely-endorsed GHG accounting and reporting standard for cities, enables local leaders to build more effective climate strategies and track the performance of actions already underway.

WITHOUT GPC	WITH GPC
Different types of measurements 	One measurement 
Account for only a portion of emissions 	Consistently account for all emissions 
Unclear if climate targets will be met 	Emissions trajectory well understood 
Incomplete data limits investment 	Good data drives investment 
Unable to relate to national climate action 	Can measure city's contribution to national climate efforts
